SUMMARY

A passionate Fullstack and Mobile Developer skilled in building modern, user-centered web and cross-platform applications. Experienced in developing scalable backend systems, mobile apps, and managing server deployments, complemented by strong teamwork and organizational leadership.

EXPERIENCE

PT Viskal Karunia Saputra (viskal.id), Bali

Full-Stack Web Developer Part-Time — Sept 2026 – Present

- Promoted to Part-Time Fullstack Developer to scale, maintain, and add new features across the company's internal suite: 10x (task tracker & productivity), CRM, Ledger, and HRIS.
- Engineered scalable backend architectures with Express.js and managed production deployments, server configuration, and reliability on VPS.

Full-Stack Web Developer Intern — Jun 2026 – Aug 2026

- Initiated and built internal company web applications including 10x (task tracker & productivity), CRM, Ledger, and HRIS using Vue.js, Astro, and Express.js to digitize daily operational workflows.
- Collaborated on RESTful API integration and initial deployment of internal web services onto VPS environments.

PT Pley Nusantara Kreatif (letspley.id), Bali — May 2026 – Present

Mobile and Full-Stack Developer Freelance

- Developed cross-platform mobile applications using Flutter for a daycare management app (HOMI) and a children's class booking platform (PLEY).
- Built and maintained companion and admin web platforms and dashboards using Vue.js and Astro.
- Engineered high-performance RESTful backend services using Golang and managed application deployments on VPS.

PT Jinom Network Indonesia (jinom.net), Bali — Feb 2026 – May 2026

Fullstack Web Developer Intern

- Contributed to the development and maintenance of the USDM (Internal Management System), specifically optimizing Configuration modules.
- Enhanced application security and data integrity by implementing strict input validations (Regex, case-sensitivity, unique constraints) across backend and frontend to prevent data duplication and injection.
- Standardized UI/UX patterns by refactoring alert mechanisms, transitioning from intrusive popup alerts to user-friendly inline validation messages.

Coding Camp 2026 Powered by DBS Foundation, Remote — Jan 2026 – Jun 2026

AI Engineer Cohort

- Immersed in an intensive Machine Learning curriculum, mastering Python programming, Data Cleaning, and Exploratory Data Analysis (EDA) to prepare datasets for modeling.
- Developing predictive models using Supervised and Unsupervised Learning algorithms (Regression, Classification, Clustering) with libraries such as Scikit-Learn, Pandas, and NumPy.

Asah Program led by Dicoding and Accenture, Remote — Aug 2025 – Feb 2026

React – Backend Cohort

- Assisting in developing web applications using HTML, CSS, and JavaScript with the React library under senior developer supervision.
- Developed full-stack web applications using React.js and Node.js, following Agile SDLC methodologies to ensure iterative delivery and adaptability to feedback.
- Supporting the implementation of UI/UX improvements based on user feedback and mentor guidance.
- Supported backend development tasks including API integration, request/response handling, and data flow between frontend and server.

EDUCATION

Udayana University, Bali — Sep 2023 – Present

Bachelor of Information Technology
GPA 3.82 of 4.00

ORGANISATION EXPERIENCE

Head of Publication Documentation, Design KWU 2025	July - Sep 2025
Staff of Student Association – Bulletin Division 2025	Jan - Dec 2025
Staff of Publication Documentation, Design ITCC 2024	Jun - Nov 2024
